

Session 30

Focused Trading Practice

Introduction

The purpose of this exercise is to identify good and poor trades, learn from past mistakes, and improve trading decisions. It helps students follow a trading plan and make better entry and exit decisions

Good Trade Evaluation

I Selected Trade No:5 as a good trade. Because I bought at \$80,297.33 and sold at \$80,858.64 with a profit of \$6.17. From this trade I learned to wait for the correct time to enter and exit by following a combined strategy.

Poor Trade Evaluation

Some of the previous trades had very small profit or loss. This happens because I made a poor entry and exit plan. Out of 5 trades one became a loss. From this trade I learned to make a correct entry and exit plan, and avoid holding the trade for too long.

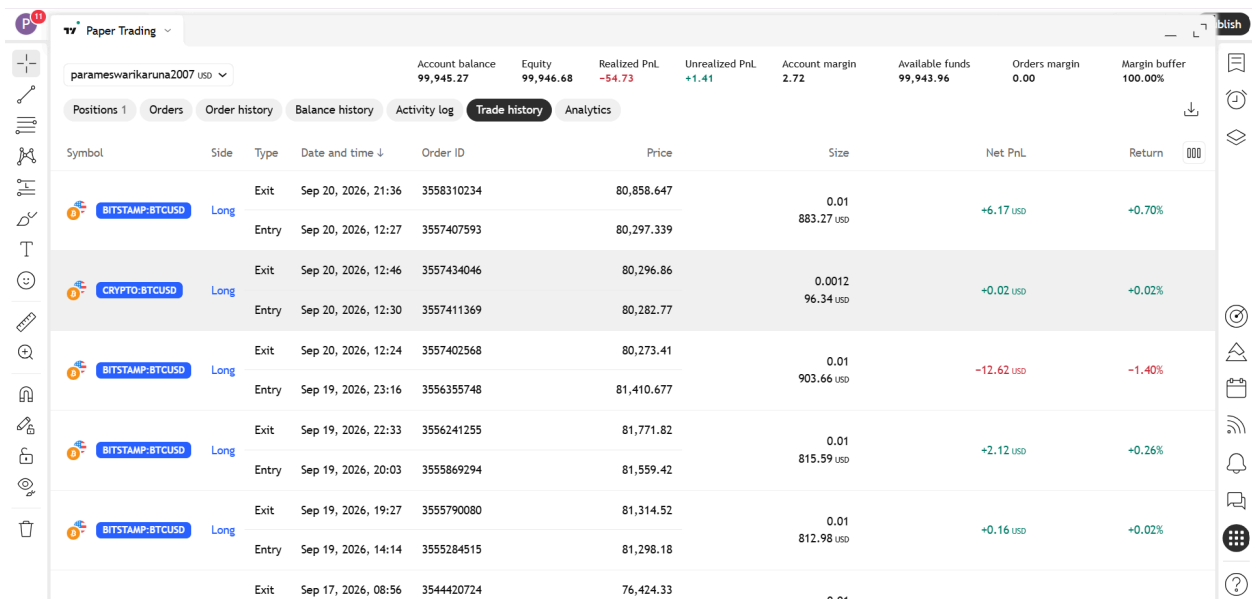

Focused Trading Report

In this session, I executed 5 focused trades by using Combined Strategy. I planned the trade before entering and exit at the correct time. In these trades I corrected the previous mistakes and made profit in 4 trades among 5 trades.

Overall Reflection

I have improved because I followed the plan and avoided previous mistakes. But I need to improve my entry and exit timings to earn more profits. In future trading I will make correct plans, close trades at correct time and don't hold the trade for too long to earn more profit and avoid many losses

Screen Shot

The screenshot displays a trading platform interface for 'Paper Trading'. At the top, account statistics are shown: Account balance (99,945.27 USD), Equity (99,946.68), Realized PnL (-54.73), Unrealized PnL (+1.41), Account margin (2.72), Available funds (99,943.96), Orders margin (0.00), and Margin buffer (100.00%). Below this is a navigation bar with tabs: Positions 1, Orders, Order history, Balance history, Activity log, Trade history (selected), and Analytics. The main area features a table of trade history with columns: Symbol, Side, Type, Date and time, Order ID, Price, Size, Net PnL, and Return. The table lists several trades for BITSTAMP:BTCUSD and CRYPTO:BTCUSD, including entry and exit details, order IDs, prices, sizes, and net profits/losses.
